

**DIABETES  
FOUNDATION  
OF MISSISSIPPI**

## **This Tag Can Save Your Life!**

The signs and symptoms of low blood sugar often mimic that of intoxication, making it difficult for law enforcement officials to know the difference. That is why the Diabetes Foundation of Mississippi (DFM) implemented the “**Lifesaver Campaign for Law Enforcement,**” a program designed specifically for all law-enforcement officials in our state. Since its inception, this program has elicited responses from law enforcement agencies nationwide. Keep in mind that this is not a vanity tag.

There is no additional charge for the license plate if the car title is registered in the name of the driver who has diabetes. However, if the title is in someone else’s name, but the person with diabetes is the primary driver of the car, there is a charge of \$31 for a diabetes license plate. **For more information about the car tag or the special driver’s license, please contact your local Department of Motor Vehicles.**

The Diabetes Foundation of Mississippi’s Lifesaver Campaign for Law Enforcement program provides law-enforcement personnel with the tools necessary to identify and treat a diabetic emergency appropriately. The DFM has educated the Highway Patrol, the Sheriff’s departments, and the local police departments statewide. Law Enforcement officers contribute a vital public service to our communities, and the DFM’s goal is to give them the knowledge they need to prevent a manageable incident from becoming a fatality.

The Diabetes Foundation of Mississippi is the **only** diabetes organization in the state dedicated to serving all Mississippians with diabetes – from our children to our seniors – through programs, research, patient assistance, support and education. Is it drinking, drugs, or diabetes? **What you know could save a life! For more information about this campaign or the diabetes license tag, call the DFM at 877 DFM CURE or in metro Jackson, 601-957-7878.**
